DETAILED ACTION

Claim 1 is presented for examination.

Priority

Acknowledgement is made that priority either foreign or domestic is claimed for this application and as such the date (03/27/1997) is being used for this examination.

Information Disclosure Statement

Acknowledgement is made that no Information Disclosure Statement (IDS) was provided with the application.

Drawings

Acknowledgement is made that the drawings are not objected.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. US 6199182 B1. This is a double patenting rejection.

Examiner believes that any connecting of an electrical device or component to a path connected to another device is equivalent to directly connecting the electrical device or component to the other device.

As per claim 1 of patent #6,199,182 contain(s) every element of claim 1 of the instant application. As such claim 1 of the instant application is not patentably distinct from an earlier claim.

"A later patent claim is not patentably distinct from an earlier patent claim if the later claim is obvious over, or **anticipated by**, the earlier claim. In re Longi, 759 F.2d at 896, 225 USPQ at 651 (affirming a holding of obviousness-type double patenting because the claims at issue were obvious over claims in four prior art patents); In re Berg, 140 F.3d at 1437, 46 USPQ2d at 1233 (Fed. Cir. 1998) (affirming a holding of obviousness-type double patenting where a patent application claim to a genus is anticipated by a patent to a species within that genus). " ELI LILLY AND COMPANY v BARR LABORATORIES, INC., United States Court of Appeals for the Federal Circuit, ON PETITION FOR REHEARING EN BANC (DECIDED: May 30, 2001).

Accordingly, absent a terminal disclaimer, claim 1 is rejected under the doctrine of obviousness-type double patenting for being anticipated by, and thus not patentably distinct from, claims of patent #6,199,182
